

The power behind competitiveness

Delta UPS–Ultron Family

DPS Series, Three Phase

160/200 kVA

Leading in power performance and efficiency

Delta's Ultron DPS is a double-conversion and IGBT-rectifier three phase UPS. With state-of-the-art TLI (Triple Level Inverter) and three phase PFC (power factor correction) topology, the Ultron DPS features industry leading performance of up to 96 % AC-AC efficiency, input power factor > 0.99, output power factor of 0.9 and low iTHD < 3%. Aiming to achieve the highest availability possible, Delta has enhanced special designs for battery management, hot-swappable fans and ease of maintenance.

The excellent power performance and high system availability of the Ultron DPS provide customers with the benefits of a stable power supply, high power efficiency, low capital investment and low overall operation cost.

Reliability

- N+X redundancy or hot-standby configuration increases system reliability
- Wide input voltage range -40% ~+ 20% allows the UPS to work in harsh electrical environments
- Field programmable sequential start-up 2 to 99 seconds prevents transient current draw to the generators
- Intelligent fan speed control and redundant fan design prevent overheating
- Comprehensive battery management sustains battery lifetime and optimal operation

Efficiency

- Achieving 95% efficiency at 30% light load and up to 96% efficiency at 50% load saves on operation costs
- High input power factor (> 0.99) and low input harmonic distortion (iTHD < 3%) save upstream investment

Flexibility

- Parallel expansion without extra hardware allows quick capacity upgrade to meet business growth
- Optional model with built-in isolated transformer

Easy Maintenance

- Hot swappable fans and removable charger box reduce maintenance lead time
- Built-in manual bypass allows "zero downtime" during service maintenance
- Main I/P, O/P and bypass switches detection provide quick diagnosis when faults occur
